

Circuit Diagram

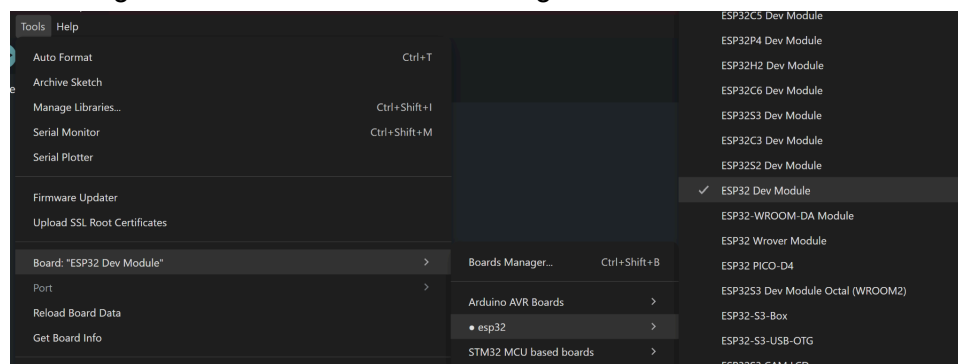

Install Board Manager for Elegoo ESP32 by Espressif Systems (do not install Arduino)

Install library adafruit MPU6050 whole package

Choosing an ESP 32 Dev Module for Elegoo ESP32

Change to 0x69 if the Arduino IDE does not detect the MPU6050

```
if (!I2C.begin(0x68, &Wire)) //change 0x68 to 0x69 if MPU6050 not detect due to AD0 pulled HIGH
```

Check the DMM to make sure good connection

```
VIN -> ESP32 3.3V");  
GND -> ESP32 GND");  
SDA -> GPIO 21");  
SCL -> GPIO 22");  
MPU6050 I2C address");
```
